CopyPilot AI by Fixiby

Agentic SEO & Sales Copywriter for Shopify — merchant guide and App Store review briefing.

Contact: **info@fixiby.com** · Site: fixiby.com · Live: fixiby.vercel.app

THE PROBLEM

Flat product copy kills conversion and SEO

Merchant pain

- Hours spent rewriting PDPs by hand
- Meta titles & alts left empty or keyword-stuffed
- Admin-style bullet dumps that do not sell

Business impact

- Lower click-through from search & collections
- Inconsistent brand voice across hundreds of SKUs
- Fear of tools that overwrite inventory fields

THE SOLUTION

Approve-first AI listing packages in Shopify Admin

Workflow

Select market + language → generate SEO + AIDA → review → **Approve & publish**. Nothing changes until the merchant confirms.

Safety

Writes title, description, SEO metafields, image alt text. Does **not** mutate variants, inventory, or prices.

Credits

Exact rule from product: **1 generation = 1 credit**. Bulk = N credits for N products.

Billing

Shopify Billing: Free 10 / Starter $19·50 / Growth $49·150 / Scale $99·400 + Boost packs $9·10 / $24·30 / $69·100.

FEATURE SPOTLIGHT A

SEO + GEO + AIDA generation

- Title Case sales titles (vendor + product words capitalized)
- Emotional AIDA HTML with FAQ blocks for AI Overviews
- Uses existing product features when description exists
- Blocks invented claims (free shipping, awards, “Google ranked”…)
- Keyword suggestions + optional custom keywords

Dual analysis scores

SEO /100 — meta length, keyword coverage, image alt.
GEO /100 — AI search readiness (FAQ, specs, citation-friendly structure for AI Overviews / ChatGPT / Perplexity).

SHOPIFY BILLING · LIVE PLAN CONFIG

Plans & credit packs

Plan	Price	Credits / mo	Highlights
Free	$0	10	TR+EN · SEO+AIDA · publish · Image SEO
Starter	$19	50	6 langs · media · brand
Growth	$49	150	Bulk generate + publish (Most popular)
Scale	$99	400	High-volume bulk · SLA (Best value)

One-time Boost packs

Boost 10 — **$9** · Boost 30 — **$24** · Boost 100 — **$69**
Rule: **1 generation = 1 credit**. Bulk of N products = N credits.

PERFORMANCE FRAMING

How we think about listing lift

Illustrative relationships (not a guarantee)

Conversion rate:

$$\mathrm{CR} = \frac{\mathrm{Orders}}{\mathrm{Sessions}}$$

Click-through from search impression:

$$\mathrm{CTR} = \frac{\mathrm{Clicks}}{\mathrm{Impressions}}$$

Bars are illustrative for review briefings; live results vary by catalog quality and traffic mix.

TECHNICAL POSTURE

Storefront PageSpeed stays merchant-controlled

- Primary product work happens in **Admin UI extension** — not on every storefront page render
- Theme app extension is gated with `request.design_mode` so shoppers don't load the editor UI
- No requirement to inject heavy third-party chat widgets for core copy generation
- Compliance webhooks on `fixiby.vercel.app` with HMAC verification (401 on invalid signatures)
- Least-privilege scopes: products + themes only — no customer/order access

Reviewer note: Theme scripts used for design-mode tooling should not block critical storefront path for average visitors.

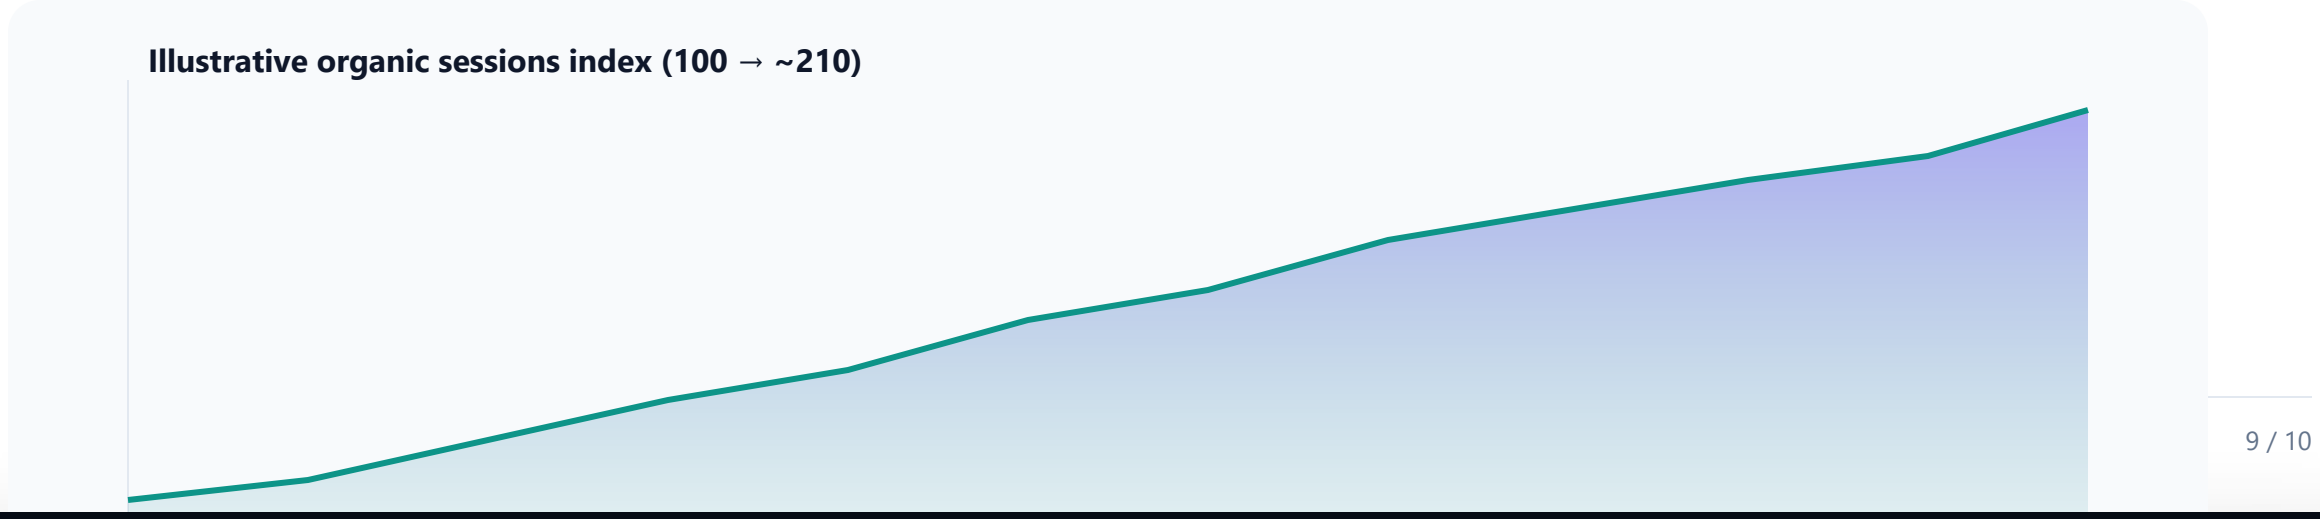

COMPARISON

CopyPilot AI vs. manual listing work

Dimension	Manual	CopyPilot AI
Draft speed	Hours / category	Seconds per product draft
Structure	Inconsistent	AIDA + SEO meta pack
Safety	Risk of inventory edits	Variant/stock fields preserved
Scale	Linear headcount	Bulk on Growth / Scale plans
Cost model	Agency retainers	Credits + clear $0–$99 plans

12-MONTH ORGANIC TRAFFIC ILLUSTRATION

Catalog freshness compounds SEO exposure

APP STORE REVIEW Q&A

Transparent answers for reviewers

Customer data?

No customer/order scopes. Compliance webhooks acknowledge requests and return 200 after HMAC validation.
